

Associate Professor

Mihoko Satogami

home Mihoko Satogami

Profile

Faculty of Business Administration Department of Business Admini

Specialized Field	Comparative Management, Human Capital, and Business Theory
Research theme	1. Analysis of the German Labor Market 2. Comparative Study of Diversity Management
research summary	I am interested in and researching "work," something people spend a large part of their time doing throughout their lives. Working styles and attitudes toward work vary depending on country, generation, era, or the situation an individual finds themselves in. These differences are heavily influenced not only by differences on the part of the workers, but also by differences on the part of companies and management, and these interact to create systems. In today's society, where diversity is required, a major research theme is what is needed to build a win-win relationship between companies and workers.
Subjects in charge	International Regional Management, Business Management, Global Program, First Year Seminar, Humanistic Management Seminar
Main career, work history, and academic	Graduated from the Graduate Graduate School of Economics of Modern Economics and Business Analysis, Doctoral Program
